

CBKZ-SLNW1

Network Workflow flexibility

The PXW-Z190 4K Handheld Camcorder is easily upgraded to offer advanced network capabilities with the permanent CBKZ-SLNW1 upgrade license. Once this software license is installed, the Z190 is capable of live streaming and file transfer using a wired or wireless LAN or LTE modem connection, enabling immediate editing and live monitoring. Advanced Content Browser Mobile™ features, including trimming proxy and high resolutions clips prior to sharing, are also enabled.

- **XDCAM air secure wireless workflow***
- **High quality H.264/HEVC QoS Streaming to Sony's Network RX station****
- **Stable and High Quality Dual Link QoS streaming using two mobile networks via USB modems**
- **Network Intercom**:** connect a third-party headset using USB port to enable communication between the camera operator and receiver
- **MPEG TS UDP streaming to compatible third-party and Sony wireless receivers**
- **FTP Transfer of proxy and high resolution clips to remote servers**
- **Wired LAN streaming and file transfer**
- **Additional Content Browser Mobile™ functions including: adding Shot mark to Clips, Renaming Proxy Clips, downloading Proxy Clips to mobile devices and Proxy Edit by Story Board**
- **Trimming proxy and high resolution clip prior to sharing**

* Please contact your local Sony specialist for XDCAM air availability in your region.

** Requires optional PWS-110RX1A receiver with appropriate license or XDCAM air contract.
