

HKC-SM27

Single mode fibre kit

Overview

Connects with the HDCE-200, HDTX-200 and HDFX-200 to provide long-distance transmission between HDC series camera and HDCU series Camera Control Unit (CCU)

The HKC-SM27 single mode fibre kit supports long-distance HD production with a single mode fibre cable, connecting the HDCE-200 camera extension adaptor or HDTX-200 digital triax to fibre camera converter and HDFX-200 digital triax to fibre CCU convertor.

Long-distance HD production

Long-distance transmission up to 10km over a single mode fibre cable to HDC series camera system.

Features

Long-distance HD production up to 10km over single mode fibre

The HDCE-200 and HDTX-200 provide a long-distance transmission from HDC series camera to HDCU series Camera Control Unit (CCU) with a single mode fibre cable by installing HKC-SM27 optional SMF kit. At the CCU end, it is possible to connect a single mode fibre cable by using the HDFX-200 with HKC-SM27 optional SMF kit installed. The system works up to a maximum distance of 10km. The type of the single mode fibre connector on the HKC-SM27 is ST type.
