

SCL-P11X15

Wide angle zoom lens

Overview

Wide angle zoom lens for high-end production

The SCL-P11X15 is a PL mount lens for CineAlta cameras such as the PMW-F55 and PMW-F5. It is a wide-angle zoom 1.5-times 11-16mm T3.0 lens aimed at high-end cinema, drama, documentary and commercials productions.

The SCL-P11X15 is compatible with any other PL Mount camcorders from Sony and also camcorders from many other manufacturers.

Features

PL mount wide angle zoom

The SCL-P11X15 is a wide angle lens offering 1.5-times zoom 11-16mm T3.0 with a PL mount for easy integration with Super 35mm CineAlta camcorders.

Features standard Cooke lens interface

The lens features a standard 4 pin Cooke lens interface giving users added flexibility.

Lens data read, used and stored

Metadata from the SCL-P11X15 lens can be viewed on a monitor connected to PMW-F55, F5 or F3 or stored on the SxS Pro card. Iris, focus and zoom data can be utilized in motion control rigs and VFX processing. This is also useful for continuity in re-shoots.
