

## SNC-ER550

720p/30 fps Rapid Dome Camera  
- E Series

### Overview

The SNC-ER550 Rapid Dome camera delivers:

- High quality 720p HD images over a wide area of view with its superb pan, tilt and zoom capabilities.
- High-speed 360 degrees endless rotation

### Features

#### **Excellent 720p HD picture quality at 30fps**

Gain the huge surveillance benefits of excellent picture quality with 720p HD supporting 30 fps at H.264 giving 1280 x 720 maximum resolution.

#### **High quality and low noise images with Exmor CMOS® sensor**

Derived from Sony's broadcast range, the high resolution Exmor CMOS sensor improves image acquisition with its low noise characteristics.

#### **High-speed 360 degrees endless rotation**

Ideal for mission critical surveillance, the camera's high-speed 360-degree endless panning capability enables it to cover a wide area quickly in a high degree of detail.

#### **Above-the-horizon tilt capability**

The camera's 15" tilt-up and total tilt range of 210" make it ideal for environments such as multi-storey car parks, shopping centres, terminals and other buildings.

### **Powerful 28x optical zoom capability**

28x optical zoom delivers greater flexibility in finding and tracking targets. 12x digital zoom capability provides a total zoom ratio of 336x.

### **Choose the compression format that suits your needs**

This camera supports three compression formats: JPEG is the best choice for high-quality still images

### **Day/Night function for optimised images in all light conditions**

True Day/Night function switches the camera between Day (colour) and Night (B/W) modes, so that in Night mode the camera becomes sensitive to near-IR light and can reproduce images not visible to the naked eye.

### **Wide-D technology optimises images with varied lighting conditions**

Wide-D technology expands the video dynamic range of your camera to improve the visibility of images with high or poor contrast.

### **DEPA for intelligent camera-side analysis**

Sony's DEPA (Distributed Enhanced Processing Architecture) technology allows the camera to send not only images but also related metadata, including object size and position, to the DEPA-enabled recorder. Unlike conventional analytic systems, where all of the image processing is performed by the recorder, DEPA thereby avoids CPU overload.

### **hPoE for greatly simplified installation**

The camera's ability to be powered through the same Ethernet

cable that it uses for data transfer, through high Power over Ethernet (hPoE – IEEE802.3at), significantly reduces physical infrastructure costs and accelerates deployment.

### **On-board recording for reduced network traffic**

The camera's SD memory card slot gives you the option to perform on-board recording to reduce network traffic.

### **RealShot Manager Lite for instant performance**

Recording software (RealShot Manager Lite) is bundled with your camera so that you can start recording and monitoring immediately.

### **ONVIF compliance for compatibility and confidence**

The camera conforms to ONVIF (Open Network Video Interface Forum) version 1.02, the widely-accepted protocol for information exchange between network video devices, giving you confidence in its breadth and ease of compatibility.
