

PVMK-PX24

Protection Panel for PVM-X2400

Overview

Protection panel for PVM-X2400 24-inch 4K HDR TRIMASTER high grade picture monitor

This accessory provides a protection panel for the portable 24-inch monitor to safeguard the premium LCD screen from scratches and impact during transportation and preparation*. It is easy to be attached and detached quickly without tool. The benefit of this is significant when renting out these monitors – for example, panel damage is reduced and there is a far lower incidence of panel replacement and downtime during rental cycles. This optional protection panel can be mounted together with the rack-mounting bracket PVMK-RX24.

* Optional protection panel cannot be used in operation for avoiding any thermal problems of the monitor.

Features

Protection panel

The protection panel is designed to fit precisely on the PVM-X2400 monitor front surface. The premium LCD screen is protected from an inadvertent scratch and shock during transportation and preparation.

Simple attachment/detachment mechanism

The protection panel grapples the monitor from the upper side and hold it by spring stoppers on the lower side of the screen

bezel. No tool is required, and you can release the spring stoppers of the protection panel by your fingers and attach and detach the protection panel.

Use with Rack-mounted monitor

This optional protection panel can be mounted together with the rack-mounting bracket PVMK-RX24.
