

CBKZ-SLHL1

HLG Upgrade License for
PXW-X400 / X580

Overview

Hybrid Log-Gamma (HLG) recording option

In response to the growing demand for high-dynamic range (HDR) production, PXW-X400 and PXW-X580* XDCAM shoulder camcorders can be upgraded to shoot in Hybrid Log-Gamma (HLG) with CBKZ-SLHL1 license option and version 5.0 or higher firmware. The colour space is compliant with BT.2020.

HLG recording provides HDR image quality with an easy file-based workflow. It makes it simple to shoot, edit and view HDR content in HLG without the need for additional colour grading, when using an HLG compatible display.

* Only available in China.
