Notes

running on Windows 7 or Windows Server 2008 R2, it is recommended to install the following update program released by Microsoft.
<http://support.microsoft.com/kb/2581464>
 Utilizing the Windows 7 or Windows Server 2008 R2 update program and Optical Disc Archive Software in combination, data reading/writing speed from ODS-D77U is improved.

1. Register and download the update program at the Microsoft support site described above.
2. Unzip and install the update program.

Notes

- Necessary settings associated with the update program are made when Optical Disc Archive Software is installed: Consequently, there is no need to perform registry settings specified at the bottom of the above mentioned support site page.
- The update program will not affect other USB devices.
- The update program is solely dedicated to Windows 7 or Windows Server 2008 R2 OS.
