SONY

PWS-110RS1

Routing Control Station

Overview

The PWS-110RS1 Routing Control Station is a system controller for a 4K/HD SDI router in the NS-BUS system. In addition to a software-based panel which is featured by default, the system can utilize MKS-R3210/MKS-R1620 /MKS-R1630 device controllers for cross-point switching. System redundancy is available when two PWS-110RS1 units are configured.
