

SZC-4001 / SZC-4001M /
SZC-4001W

The SZC-4001, SZC-4001M and SZC-4001W are the software licenses of 4K Upgrade Software that provides support for additional shooting formats for the Sony HDC-4300 Color Camera. Signal processing and output of images is performed by the connected BPU-4000 or BPU-4500 series (including BPU-4500A) Baseband Processor Units. The SZC-4001, SZC-4001M and SZC-4001W software adds support for shooting and transmission in 4K/23.98P, 24P, 25P, 29.97P, 50P, and 59.94P. The licenses give you a high level of flexibility to purchase the equipment you want, when you want it, with the confidence your camera is future-proofed for changing demands.

The SZC-4001 can be permanently used.
The SZC-4001M can be used for 30 days.
The SZC-4001W can be used for 7 days.

4K Upgrade Software

Installing SZC-4001, SZC-4001M and SZC-4001W software on the HDC-4300 enables shooting and transmission in the following 4K formats, with the 4K images being output from the connected BPU-4000 or BPU-4500 series (including BPU-4500A) Baseband Processor Units.

- 4K/23.98P
- 4K/24P
- 4K/25P
- 4K/29.97P
- 4K/50P
- 4K/59.94P
