

BRBK-MF1

HD optical multiplex card for
BRC-Z700 robotic camera

Overview

Allows transmission of HD signal up to 1,000 metres with BRU-H700 HD optical multiplex unit

The BRBK-MF1 interface card is designed for use with the BRC-Z700 HD 3 CMOS robotic camera. The combined use of this card, CCFC-M100HG optical fibre cable and BRU-H700 HD multi-mode optical multiplex unit allows up to 1,000 metres (3,281 feet) transmission of camera images, external video sync signals and control signals via one cable.

Single fibre cable

Combines multiple data for transmission.

Features

Allows use of single fibre cable

Combines multiple data for transmission.
