

HKCU-1001

SD analogue interface unit for HDCU-2000, HDCU-2500, HDCU-1000, HDCU-1500, HDCU-3300 and HDCU-1700

Overview

Extend the capabilities of the CCU

The easy-to-install HKCU-1001 interface unit provides two analogue NTSC or PAL VBS signal outputs, a PIX (picture monitor) output, and a WFM (waveform monitor) output for the HDCU-2000/-2500, HDCU-1000/-1500 and HDCU-3300 Camera Control Units (CCUs) working with HDC-2000 and HDC-1500 (HDC-3300) Series cameras. The interface unit is also compatible with the HDCU-1700 CCU working with the HDC-1700 camera.

Features

SD analogue expansion for HDCU-2000/-2500, HDCU-1000/-1500, HDCU-3300 and HDCU-1700 CCU
