

VPL-CH350

4,000 lumens WUXGA 3LCD Basic Installation projector

Overview

A great fit for demanding middle and large classrooms and meeting rooms where cost is critical

The VPL-CH350 delivers an outstanding brightness of 4000 lumens and ultra high-quality images with WUXGA resolution. Sony 3LCD BrightEra™ panel technology provides higher picture quality, substantially brighter images, higher efficiency, consistent colour stability and longer durability. It also delivers installation flexibility, environment-friendly features, and a low total cost of ownership, in a stylish design that blends into any decor. The lens shift/zoom capability and the image correction features easily allow users to fit any image onto the screen, even from an offset projection angle.

Additionally, the projector is economically designed for optimum energy efficiency, thanks to its energy saving features and has all the features and functionality that you would expect from Sony, particularly in terms of installation, projection, usability and maintenance.

Features

High resolution WUXGA image

The VPL-CH350 delivers an amazing resolution of WUXGA (1920 x 1200). Extremely clear and detailed high-quality images are

projected, even on a large screen. The VPL-CH350 is the ultimate tool for projecting images in a range of applications requiring exceptional detail.

High image quality 3LCD BrightEra™ natural and vivid colour images with high brightness of 4000 lumens

Thanks to the optical system projecting three basic colours constantly, the projector offers excellent light efficiency, which ensures colourful and bright images. Sony's BrightEra™ panels deliver improved panel light resistance, higher resolution, high brightness and increased panel reliability. High colour reproducibility is important especially when using colourful content, such as materials used in classrooms.

Fine lens shift: +/- 5%, Horizontal: +/- 4%

The VPL-CH350's lens shift range adjustment means that the projector can be positioned picture-perfect and horizontally offset to avoid any minor ceiling obstacles.

1.5:1 to 2.2:1 throw ratio

The VPL-CH350 offers a 1.5:1 to 2.2:1 throw ratio that can accommodate most large classrooms or large meeting room's current replacement installation.

Blend-in design

The VPL-CH350 has a low-profile chassis, so it appears to blend into the ceiling or wall on which it is mounted.

Advanced energy-saving features

Advanced lamp technology enables robust energy-saving features. For example, greater brightness control in Auto Light Dimming mode saves considerable energy when the projector is left on without being used. During projection, Auto Picture Mode automatically adjusts light output to suit the projected scene. When you need to mute the picture temporarily, light output can be completely deactivated to minimise energy consumption.

Specifications

Display system	
Display system	3 LCD system
Display device	
Size of effective display area	0.64" (16.3 mm) x 3 BrightEra LCD Panel, Aspect ratio: 16:10
Number of pixels	6,912,000 (1920 × 1200 × 3) pixels
Projection lens	
Focus	Manual
Zoom - Powered/Manual	Manual
Zoom - Ratio	Approx. x 1.45
Throw Ratio	1.5:1 to 2.2:1
Lens shift - Powered/Manual	Manual
Lens shift - Range Vertical	+/- 5%
Lens shift - Range Horizontal	+/- 4%
