

WQF-BM1F

Easy to use meeting display software solution for 4K Professional Displays

Overview

Make every meeting more productive with BRAVIA 4K Professional Displays - free version

Available to download at no cost, this all-in-one information sharing and display management solution for BRAVIA 4K Professional Displays helps smaller and medium-sized businesses streamline meetings - with no additional investment in hardware or software.

Features include default screen customisation, automatic input switching and a count-down presentation timer.

Also available, the WQ-BM1 BRAVIA Meeting Room Solution (chargeable) adds additional functions, including easy-to-use content sharing tools for meeting room participants plus remote control and monitoring of BRAVIA from a networked PC.

Features

Screen customisation

Give meeting participants a more professional welcome. Display images, corporate logos or web content on your BRAVIA 4K Professional Display, plus the name of the room, date/time and content pulled from other services.

Presentation timer

An on-screen countdown reminds each presenter how long

they've got left to get their message across to the meeting.

Auto input management

BRAVIA 4K Professional Displays automatically switch to the correct input when a new source is connected by HDMI.

Auto power off

Reduces energy bills by switching off the display when not in use.
