

### **BPU-4800**

4K / HD baseband processor unit and UHFR server for HDC-4800 system camera

#### Overview

## Capture 4K / HD Ultra High Frame Rate (UHFR) slo-mo for sports and other live action

A perfect complement for the HDC-4800, the BPU-4800 combines baseband processing and UHFR server functions in a single, compact rack-mounting unit. The BPU-4800 handles recording and playback of all your UHFR content, with no need for a separate server dedicated for ultra slo-mo, giving up to four hours 4K UHFR storage. Integration with the PWS-4500 through the real-time Share Play network also allows fast, seamless highlight editing. Record full-resolution 4K Ultra HD images from the HDC-4800 at up to 8x or Full HD at 16x to reveal split-second action. The unit also allows you to create a powerful replay server system, plus gives you Full HD cutout and zoom capabilities.

This product contains pre-installed software and requires the purchase of licence keys to activate some functions.

### Features

### Every split-second of sporting action, captured in 4K

You can capture the dynamic excitement of live sports in 4K ultra slo-mo with the BPU-4800, the dedicated baseband processor unit for the HDC-4800 system camera. You can record breathtaking 4K Ultra HD images at up to 8x (479.52 fps) or 4x

(239.76 fps) slow motion\*1 and Full HD at up to 16x (959.04 fps) or 8x (479.52 fps) slow motion\*2.

- \*1 Optional SZC-4008 software is required
- \*2 Optional SZC-2016 software is required.

## Efficient file sharing over IP networking with Share Play function

The Share Play function can be utilised when the system is configured with the PWS-4500 server connected to the HDC-4800 together with the BPU-4800 via the network. Once clips have been recorded by the BPU-4800, the Share Play function enables these clips to be shared among all connected PWS-4500 servers. This delivers a more efficient workflow. For example, PWS-4500 server operators and highlight operators can view the clips in the BPU-4800, and can playback and output any of these clips from their own local server. There is no need to push or pull clips between different servers.

## Simultaneous 4K HFR data and high-quality XAVC recording\*3

The BPU-4800 allows 4K HFR data and simultaneous high-quality XAVC recording – with up to four hours record time and no need for a separate record/playback server.

\*3 Optional software is required.

### **Replay function**

Using just the HDC-4800 and BPU-4800 along with control devices\*4, you can create a powerful replay server system with intuitive GUI operation that includes slow-replay control, highlight editing, and touch-panel capabilities.

\*4 The PWSK-4403 Control Panel, the PWS-100PR1 Production Control Station and the PWS-110MG1 Media Gateway Station are required for the replay system.

#### **HD** cutout function

Powerful processing allows a Full HD high frame rate (HFR) image to be cut out from a 4K picture in real time. During replay, any portion of the captured image can be cropped to provide a close-up HD HFR image. This gives directors a powerful editorial tool to enrich live sports coverage with detailed analysis of the action.

### 4K fibre transmission up to 2,000m as standard

The BPU-4800, configured with the HDC-4800 system camera and HDCU-2000 camera control unit can operate across standard SMPTE fibre cables for distances up to 2,000m.

### Specifications

General		
Power requirement	100 V to 127 V/200 V to 240 V AC, 50/60 Hz	
Current consumption	4.5 A (max)	
Operating temperature	5°C to 40°C (41°F to 104°F)	
Storage temperature	-20 °C to +60 °C (-4 °F to +140 °F)	
Mass Approx.	16.5 kg (36 lb 6.0 oz)	
Dimensions (W x H x D)	424 x 132 x 410 mm (16 3/4 x 5 1/4 x 16 1/4 inches)	

### Input/output connectors

CAMERA	Optical/electrical multi-connector (LEMO 3K.93C connector) (x1)	
CCU	Optical/electrical multi-connector (LEMO 3K.93C connector) (x1)	
REMOTE (RCP/CNU)	8-pin multi-connector (x1)	
LAN	8-pin (x1)	
SHARE PLAY	1/2 SPF+ (x2)	
REMOTE 1/2	RJ-45 (x1)	
GPIO (25P)	25-pin D-Sub, female (x1)	
NETWORK1 to 2 RJ-45 (x2)	1000BASE-T	
MAINTENANCE	USB (x1)	
NETWORK SFP+ (x1)	10GBASE-SR/LR (Add-in Card)	
Input connectors		
AC IN 100 V to 127 V/200 V to 240 V AC (x2)	SDI1, SDI2 BNC (x2)	
3G-SDI	SMPTE ST424/425 Level-A/B, 2.970 Gbps/2.967 Gbps	
HD-SDI	SMPTE ST292, 0.8 Vp-p, 75 Ω, 1.485 Gbps/1.4835 Gbps	

REFERENCE IN	BNC (x1) HD: SMPTE ST274, tri-level sync, 0.6 Vp-p, 75 $\Omega$ SD: Black burst (NTSC: 0.286 Vp-p, 75 $\Omega$ /, PAL: 0.3 Vp-p, 75 $\Omega$ )
TIMECODE INPUT BNC (x1)	0.5 Vp-p to 5 Vp-p, 10 kΩ
DIGITAL AUDIO (AES/EBU) INPUT	BNC (x4) CH 1/2 to CH 7/8, AES/EBU format, unbalanced
Note	When connecting devices for AES/EBU signal input/output, use a cable whose length is less than 300 meters (984 feet).
