

PCS-VCS90SP

HD multipoint connection unit

Overview

HD multipoint connection unit with support pack

The PCS-VCS90SP is an HD Multipoint Connection Unit, fully compliant with the H.323 protocol, which allows easy expansion for videoconferences of up to 500 sites in HD quality video. It allows for multiple screen layout, with up to 16 splits and features continuous presence mode with voice activated switching. The unit supports mixed HD/SD environments. The package is configured with 90 licences.

Stunning HD images

The PCS-XG80 adopts the H.264 video codec to bring you smooth and natural high-definition (HD) images at a resolution of 1920 x 1080 pixels.
