HDCE-100

Single mode fibre adapter for HSC and HDC fibre cameras

Overview

Enables SMPTE-311M to single mode fibre adaptation for HSC or HDC Series, providing power supply to the camera head

The HDCE-100 camera extension adaptor can convert the SMPTE-311M fibre from HSC or HDC Series to single mode fibre for long distance transmissions. The HDCE-100 provides the power supply to the camera head, avoiding the need for local power supply in the field. The HDCE-100 can also supply power to the 4K live camera through a BPU-4000 baseband processor unit when a CCU is not used for the simple 4K live systems.

Long-distance HD production
