REA-L0200

PTZ Auto Framing / PTZ Auto Tracking License for Edge Analytics Appliance

Overview

The REA-L0200 optional license activates the PTZ Auto Framing and PTZ Auto Tracking feature for the REA-C1000 Edge Analytics Appliance.

From firmware version v5.0, PTZ Auto Framing, which has evolved auto-tracking function dramatically, has been added to REA-L0200 in addition to the conventional PTZ Auto Tracking. Customers who are already using REA-L0200 can enjoy the PTZ Auto Framing functionality free of charge by simply updating the firmware.

Connected to a SONY PTZ camera, the newly added PTZ Auto Framing feature offers powerful AI-powered video analytics, which can automatically detect and track the position of a presenter within the camera frame. As the presenter moves, the camera's pan/tilt/zoom mechanism ensures that the presenter is always framed naturally, without the need for a human camera operator to manually follow their movements. This offers a cost-effective tracking solution for a variety of applications including education, corporate, broadcast, sports and events.

Note: This is an activation key for pre-installed software.
Note: This license does not support ILME-FR7, SRG-A40 and SRG-A12.
Note: SRG-X40UH supports PTZ Auto Framing only.

Note: PTZ Auto Tracking does not support tilt and zoom tracking.
Note: PTZ Auto Tracking and Handwriting extraction (REA-L0100) can be run simultaneously. PTZ Auto Framing is not available for the simultaneous use with Handwriting extraction.
