SNC-EB600B

Basic Box-type 720p/30 fps
Camera Powered by IPELA
ENGINE EX™ - E Series

Overview

**This highly affordable yet versatile HD fixed
network camera is ideal for everyday security
applications.**

This easy to install fixed network camera with an attractively price
brings crisp HD imaging quality to a wide range of indoor security
and surveillance applications, from offices, banks and retail
spaces to education.

Sony's Exmor CMOS sensor captures crisp, clear, low-noise HD
images for sure, dependable monitoring – even in tricky low-light
situations.

As a part of Sony's latest generation of video security cameras,
the SNC-EB600B features Sony's award winning IPELA ENGINE EX
processing platform. This boosts image quality in a wide range of
environments, including challenging low-light scenes.

View-DR LT expands dynamic range for improved imaging in
high-contrast and strongly backlit scenes, like sun-drenched
offices or car park entrances. Image stabilisation keeps video
images crisp and clear, even when the camera is subject to
vibration on a mounting pole or bracket.

Features

See every scene clearly with HD image quality

View fine detail in a wide range of everyday video security and surveillance environments, from retail spaces to banks and schools. The high resolution Exmor CMOS sensor assures crisp, clear HD 720p images – even in low light conditions like dimly-lit car parks.

Best-ever imaging performance with IPELA ENGINE EX

At the heart of Sony's latest generation of cameras, the powerful IPELA ENGINE EX processing platform combines several technologies for optimises HD picture quality. View-DR LT combines images taken at different shutter speeds, delivering a wide dynamic range up to 90 dB for excellent performance in high contrast, strongly backlit environments.

Steadier, more stable video footage

The in-built image stabiliser minimises the effects of camera shake – for example when the camera's pole mounted or subject to mechanical vibration. With clearer, more stable video images it's easier to see what's happening in any scene.

Don't miss that crucial moment with Intelligent Motion Detection and Face Detection

In-built motion detection can trigger a range of actions, from storage and transfer of images to sounding of external alarms. False alarms caused by noise, weather and environment noise are minimised by a smart processing algorithm. Human face detection is also supported, allowing rapid indexing of recordings to find events where a face is visible in the scene.

Detect in confidence with Edge-based Analytics

Powerful DEPA Advanced video analytics enhances Intelligent Motion Detection with rule-based alarm triggers, providing alerts with object filters like 'passing' and 'intrusion' to further reduce false alarms.

SONY

Reduce cabling costs with Power Over Ethernet (PoE)

Power over Ethernet (PoE) allows the camera be powered using the same Ethernet cable that's used for data transfer, reducing installation complexity and costs.

View and control with your smartphone

Remotely view live camera images with your Android or iOS smartphone or tablet. You don't even need to download a special app.

ONVIF (Open Network Video Interface Forum) compliance

Support for ONVIF simplifies interoperability with other network video devices. The ONVIF (Open Network Video Interface Forum) defines a common protocol for the exchange of information between network video devices, including automatic device discovery and video streaming.

Triple streaming for extra operational versatility

Configure up to three simultaneous IP video streams to suit your operating needs. For example, one stream for high quality live viewing; another for storage-efficient recording; and a third for viewing over a low bandwidth connection or on mobile devices.

Day/Night operation for clearer images around the clock

See clear images at any time of day – or night. Day/Night operating modes can be selected manually or automatically, ensuring excellent image clarity whether you're viewing in bright sunlight or near-darkness.
