

## FWD-65AF8/T

65" BRAVIA 4K HDR  
Professional Display

### Overview

Bring eye-catching depth, contrast and resolution to your business with the FWD-65AF8/T 65" BRAVIA OLED Professional Display, combining bright, beautiful 4K HDR image quality with easy operation, flexible networking/control and extensive integration options.

Ideally suited to professional use, BRAVIA takes full advantage of cutting edge OLED display technologies to ensure vibrant high-contrast 4K images. Integration in corporate environments is simplified by Pro mode that allows easy customisation of display settings to suit different applications.

The stunning edge-to-edge design of BRAVIA is sure to impress in any setting. And thanks to Acoustic Surface™ technology, sound comes directly from the 65" screen without the need for surrounding speakers.

It's easy to create attractive digital signage, mixing media files and online content with no need for additional player hardware. There's also a wide range of APIs (Application Programming Interface) options to enable remote control/monitoring and integration with

external systems.

## Features

4K offers four times the detail of Full HD, with a resolution of over 8 million pixels bringing extra clarity to corporate display, education and digital signage applications.

Each self-illuminating pixel is precisely and individually controlled, for exquisite images with unprecedented contrast. You'll see even more accurate detail, colour and shades in every scene.

The 4K HDR Processor X1™ Extreme includes powerful real-time image processing for exceptionally detailed, realistic pictures. Lower resolution images are upscaled closer to true 4K HDR quality.

TRILUMINOS Display maps colours from a wider palette, faithfully reproducing a world of richer, more lifelike hues and tones.

The FWD-65AF8/T meets the needs of a wide range of business applications, with flexible installation options plus wired and wireless network connection and serial communication control.

Integrated support for HTML5 makes it easy to produce compelling digital signage, with no extra hardware or prior training needed. Combine graphics, text, 4K video and live web content to create attractive signage in

minutes.

Unlike ordinary TV speakers, Acoustic Surface™ technology brings your audience sound from the entire screen.

BRAVIA can play video files in a wide range of formats via USB.

Discover a world of apps and online content powered by Android TV. Use Voice Search to find content easily with no typing.

BRAVIA Professional Displays offer flexible mounting options with VESA standard mounting for easy integration into a wide range of environments.

Control the display remotely – including on/off, input signal select and adjust volume – over IP via RJ45 by web API.

Send content to display on BRAVIA from other professional and personal devices, including laptops or Android/iOS phones and tablets.

Customise and store display settings and features, then copy them easily to multiple displays via USB flash memory.

Stay up and running with our enhanced support service

cover. If there's a problem with your professional display, we'll offer a free replacement rather than repairing your existing unit.
