

PWSK-4506F

Networked Media Interface Board for PWS-4500 Live Server

Overview

Connecting with IP network to allow video and audio signals to be received and transmitted.

Sony has been developing a next-generation production infrastructure using 10 GbE IP networking, culminating in a practical solution for IP live production systems, the Networked Media Interface. This interface is available with the PWS-4500 system. You can connect with any IP live production environment simply by installing the optional PWSK-4506F Networked Media Interface Board to PWS-4500 live server, allowing video and audio signals to be received and transmitted over an IP network.

**Providing Networked Media Connectivity to PWS-4500
10G fiber (SFP+) connectors x 8**
