

ACC-U60

Battery accessory kit for XDCAM
handy type camcorders

Overview

BC-U2 charger, two compact BP-U60 lithium-ion batteries and a 16 GB SxS-1™ memory card

The ACC-U60 battery accessory kit provides battery supplies for handy type XDCAM products. The kit includes a BC-U2 two-channel simultaneous battery charger, which is able to charge two compact BP-U60 batteries (also supplied), or charge one battery while supplying DC power to a camcorder. The robust 16 GB SxS-1 memory card provides high transfer speeds for recording and transferring XDCAM content.

Two-channel charger

The unit can simultaneously charge two batteries.

Features

BC-U2 two-channel simultaneous battery charger

The BC-U2 simultaneously charges two BP-U90/U60/U30 batteries. It can charge one battery while supplying DC power to a camcorder.

BP-U60 battery boasts high power in a compact body

The compact, 420g (15 oz) lithium-ion battery features 57 Wh capacity. The BC-U2 charges one or two BC-U60 battery in 150 minutes.

Robust 16 GB SxS-1 memory card

The supplied 16 GB SxS-1 memory card uses the PCI Express interface to achieve an extremely high data transfer speed of 800 Mbps. These cards can resist considerable shock (1500 G) and vibration (15 G).
