

HKC-TR37

Digital Triax Transmission
Adaptor for HDC camera series

Overview

Third Generation Digital Triax Transmission Adaptor for HDC camera series

The HKC-TR37 is an optional side panel that adds third-generation digital triax connectivity to the Sony HDC-3500 and HDC-3500H System Cameras.

This allows easy exchange between fibre or triax transmission to suit operational requirements. Since all replacement connectors are located within the exchangeable outside panel, camera balance is maintained.

The Sony HDC-3500 and HDC-3500H 4K/HD System Cameras offer exceptional imaging performance, mobility and creative flexibility to satisfy today's demanding live production requirements.
