

HXR-FMU128

128 GB flash memory recording unit

Overview

The HXR-FMU128 Flash Memory Unit is an optional solid-state memory recorder designed for NEX-FS700E, NEX-FS700EK, NEX-FS100E, NEX-FS100EK, NEX-EA50E and HXR-NX5E camcorders, and attaches directly to the right side of the camera with ease. Hybrid recording functionality is possible by being able to record on both the HXR-FMU128 and Memory card at the same time. The unit also offers long recording times of up to 10 hours at the highest HD quality (28Mbps) and 11 hours at 24 Mbps

Hybrid Recording

The HXR-FMU128 is capable of simultaneous recording of HD and HD video footage, along with the combination of HD and SD, offering instant backup and fast NLE workflow coupled with flexibility of recording in the field.

Simple Direct Attachment

The HXR-FMU128 is designed exclusively for the HXR-NX5E camcorder, and attaches directly to the back of the camera with ease.

Long Recording Time

The memory unit offers approximately 10 hours of continuous HD recording in the highest 28 Mbps mode and 11 hours at 24 Mbps. This is particularly useful for corporate and event videographers looking at extended recording times.
