

BVML-HE171

HDR monitoring licence for BVM-E171 TRIMASTER EL™ OLED critical reference monitor

Overview

Permanent software licence allows BVM-E171* to support fantastic HDR images

The BVML-HE171 HDR licence allows the BVM-E171 TRIMASTER EL™ OLED critical reference monitor to support HDR images, with wide colour gamut, and OLED black pictures with pixel dimming and great off-axis performance. The HDR licence supports EOTF 2.2, 2.4, 2.6 CRT, S-Log3(HDR), S-Log3(Live HDR), S-Log2(HDR), ITU-R BT.2100(HLG), SMPTE ST2084, 2.4(HDR).

* BVM-E171 monitor must be updated to V1.1 or later first. The HDR features are activated via the BKM-17R monitor control unit.

Fantastic HDR performance

The BVML-HE171 HDR licence allows your monitor BVM-E171 V1.1 or later to display fantastic HDR images, with wide colour gamut and OLED black pictures with pixel dimming and great off-axis performance.

Activate with BKM-17R monitor control unit

The HDR features are activated via the BKM-17R monitor control unit. Order the purchase key for the BVML-HE171 from your Sony sales representative, receive your activation (install) key from the Sony ULMS(Upgrade and License Management Suite) <https://ulms.sony.net/>, then download and save the licence to USB Memory. You can then insert the USB Memory to the BKM-17R to activate HDR features of your BVM-E171 with V1.1 or later.

Activation key for pre-installed software.
