

## PCSA-B768S

ISDN unit for PCS Series Video Communication System

### Overview

This ISDN interface unit is designed for use exclusively with Sony PCS Series Video Communication Systems.

Up to six ISDN lines can be connected (via 12B channels), providing a total bandwidth of 768kbps for multi-point conferences with smooth, crisp sound and picture quality.

### Features

#### **Hold conferences over ISDN**

Video conferences can be held over standard ISDN lines as an alternative to using a broadband (IP) network connection.

#### **Use up to three ISDN lines simultaneously**

Boost your conference bandwidth by connecting up to six ISDN lines via 12B channels. Support for ITU-T H.320 standards gives total available bandwidth of up to 768 kbps via ISDN.

#### **Compatible with Sony PCS Series**

The PCSA-B768S is designed for use exclusively with Sony PCS Series Video Communication Systems.
