

BRBK-SA1

Analogue SD output card for
BRC-H900P and BRC-Z330
robotic cameras

Overview

Down-converts camera output to SD

The BRBK-SA1 output card is designed for use with the BRC-H900P and the BRC-Z330 Full-HD robotic cameras. It also works with the BRU-SF10 HD optical multiplex unit that connects to the BRC-Z330 and BRC-H900. Use of this card allows output of images shot by the cameras as down-converted analogue signals. The unit includes 1x BNC for VBS, 1x Mini DIN for S-Video and 1x D-sub for RGB/SYNC outputs.
