

CBK-DCB01

Remote control unit for PMW-F55, PMW-F5, PMW-F3, PMW-320, PMW-350, PMW-500, PMW-EX3*

Overview

Rear camera focus and zoom control of Sony camcorders

The CBK-DCB01 extends the flexibility of the PMW-F3, -F5 & -F55 – in combination with Sony’s high power zoom lens SCL-Z18X140 – and other camcorders by bringing remote zoom and focus functionality. This extends the flexibility of the PMW-F series and Sony ENG camcorders with a combination of studio focus and zoom remotes.

Zoom rocker for direct zooming

The CBK-DCB01 also features a zoom rocker that can be directly used for zooming.

* Firmware upgrade may be required to support CBK-DCB01.

Features

Zoom rocker for direct zooming

The CBK-DCB01 features a zoom rocker that can be directly used for zooming.

Connector for camera remote controls to extend functionality

The CBK-DCB01 can be connected with camera remotes such as the Sony RM-B170 remote control panel to enable enhanced

camera controlling. The unit can also connect with remote control panels from Canon and Fujinon for focus and zoom remote control. [Focus: Canon FR-35 and Fujinon EPD-21A-A02. Zoom: Canon ZSD-15M2 and Fujinon ERD-20A-A02.]

Compact design for ease of use

The unit is lightweight and ergonomically designed and can be attached directly on a tripod bar.

Camera cable

The CBK-DCB01 is supplied with a 1m 8pin cable to connect directly with the PMW-F series cameras and other camcorders.
