

PCSA-MPE1

4-10 port expansion software for
PCS-MCS1 Multipoint Control
Unit (MCU) System

Overview

The PCS-MCS1 HD Multipoint Control Unit (MCU) System connects up to four conferencing endpoints as standard.

Offered as an option, this PCSA-MPE1 port expansion software expands the maximum number of supported conferencing endpoints from four to ten.

Also available, PCSA-MPE2 software expands this further to a maximum of sixteen endpoints.

Activation key for pre-installed software.
