

PDBK-202

MPEG-TS adapter board for PDW-HR1/MK1 and professional media station products

Overview

Enables MPEG transport stream output from other media devices

The PDBK-202 is an additional board that is added to the PDW-HR1 or other media devices to enable input and output of high definition video (HDV) compatible streams in 1080i/720P format, and output MPEG-TS (DVB-ASI) stream.

Features

Set the transport stream

The deck can be programmed to output a lower data rate stream over DVB-ASI as you record high-quality video on disc or SxS Pro™ card, giving true versatility in recording and playback.

MPEG-2 streams from 15 Mbps

The board enables an output of 4:2:0 MP@HL MPEG-2 stream at data rates starting from 15-43.25 Mbps.

1440 x 1080 output below 35 Mbps

When using 1080i mode, you can output at 1440 x 1080 resolution stream when the bitrate is less than 35 Mbps. Above 35 Mbps, you can select a 1920 x 1080 resolution.
