

LCS-BP1BP

Soft Backpack Style Carrying Case

Overview

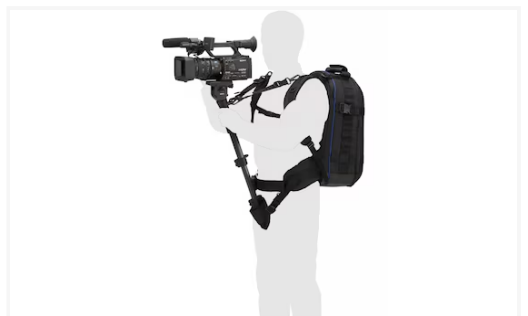

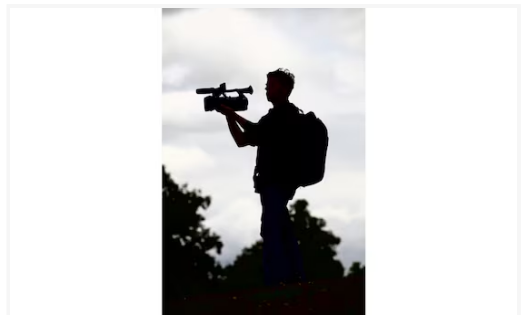

Even a compact camcorder when combined with a full set of batteries and other accessories can add up to a significant amount of weight. The LCS-BP1P is a truly ergonomic solution that makes it easy to carry around a full set of kit while still keeping your hands free. It also has numerous special features specifically created to meet the unique needs of professional camcorders users. For example, its strapping can help brace an optional VCT-SP1BP camera support.

The LCS-BP1BP's main compartment can carry any HDV or DVCAM hand-held or semi-shoulder-mount camcorder with a generous amount of supplied padding to ensure the camcorder is held securely and comfortably. Even the interior colour is carefully chosen to be a bright yellow that makes it easier to find items even in low light. There are also a number protective pouches within the compartment designed to hold batteries, wide conversion lenses and other accessories. Plus a detachable side case. You can even store a notebook computer in a specially designed side pocket and a protective rain cover for the backpack is supplied as standard.

Despite all the equipment it can store, the LCS-BP1BP fully complies with standard carry-on regulations for international air travel.
