

BKM-PL17

Protection kit for LMD-A170
monitor

Overview

AR-coated protection panel for LMD-A170 17-inch high grade LCD monitor

This accessory provides an (anti-reflective) AR-coated polycarbonate protection panel for the portable 17-inch monitor, along with corner bumpers to safeguard the monitor from scratches and impact. The benefit of this is significant when renting out these monitors – for example, panel damage is reduced and there is a far lower incidence of panel replacement and downtime during rental cycles.

* Optional protection kit cannot be mounted together with the rack mount kit.

Safeguard from scratches and impact

AR-coated tough polycarbonate protection panel and corner bumpers.

Easy clean surface

For cleaning the protection panel, wipe it gently with the supplied cleaning cloth.

High transparency, low reflection surface

The lightweight panel allows you to see the monitor images clearly.

Simple attachment/detachment mechanism

Corner bumpers have finger/coin-tighten screws and drop prevention washers. Easily, quickly attachable and detachable on-site.

Features

AR-coated protection panel

The (anti-reflective) AR-coated protection panel is designed to fit precisely on the LMD-A170 monitor front surface.

Corner bumpers with simple attachment/detachment mechanism

Corner bumpers hold the front panel in place and protect the monitor from accidental damage in the field. The corner bumpers have finger/coin-tighten screws and drop prevention washers. They are easily, quickly attachable and detachable on-site.
