

CBKZ-UPG01

Upgrade software key to enable
Live Logging with Planning
Metadata

Overview

The CBKZ-UPG01 Upgrade key for XDCAM HD422 Camcorders such as the PDW-700 and PDW-F800 enables a powerful new set of capabilities that are an intrinsic part of the XMPilot Planning Metadata solution.

Live Logging functionality

Wireless LAN capability (requires the CBK-WA01 WiFi adaptor)

Visibility and editing of Planning Metadata in the XDCAM Browser

XMPilot extends the XDCAM metadata workflow to location producers, directors and camera operators, reducing the length of time it takes to get captured material on-air.

Activation key for pre-installed software.
