

## REA-L0400

Chromakey-less CG Overlay  
License for Edge Analytics  
Appliance

**Edge Analytics Appliance**

Handwriting Extraction  
PTZ Auto Tracking  
Chromakey-less CG Overlay

### Overview

The REA-L0400 optional license activates the Chromakey-less CG overlay feature for the REA-C1000 Edge Analytics Appliance.

Using Sony's advanced motion detection technology, the presenter's image is extracted and overlaid onto any background image, animation or video in real time - creating a high-quality backdrop without the need for dedicated studio equipment or a specialist graphics operator.

Note: This is an activation key for pre-installed software
