

REA-L0200

PTZ Auto Tracking License for Edge Analytics Appliance

Overview

The REA-L0200 optional license activates the PTZ auto tracking feature for the REA-C1000 Edge Analytics Appliance.

Connected to a SONY PTZ camera, the REA-C1000 can automatically track a presenter smoothly and accurately, ensuring they stay sharply focused and within the frame at all times. This offers a cost-effective tracking solution in an education, corporate or conference setting without the expense of investing in a dedicated camera operator.

Note: This is an activation key for pre-installed software
