## MSU-3000

Master setup unit, multi camera remote control panel for system cameras (horizontal type)

### Overview

The MSU-3000 master setup unit allows, intuitive control and maintenance for the connected Sony HDC series system cameras.

Sharing the same compact horizontal form factor and familiar ergonomics as the MSU-1000, the MSU-3000 fits a 19-inch EIA rack (full-rack-mount size). It can control multiple camera systems via either 1000Base-T LAN, or a single camera by direct peer-to-peer connection via Sony CCA cable.

Operability is enhanced via a new touchpanel with improved visibility plus additional LED indicators and assignable keys. The menu page gives direct access to camera, CCU and BPU functions, while 21 assignable keys support even greater usability and expandability.

## **Features**

## Flexible, scalable system configuration

The MSU-3000 can be configured for use with large and small-scale camera control systems, sharing the same mechanical dimensions and interface system as the MSU-1000. A MSU-3000 can flexibly control up to 96 units of HDC Series system camera.

### **Customizable Switches**

Functions and Menu can be mapped to the assignable keys via

the Menu Control page, allowing quick and easy access. There will be a maximum of 21 keys in any of F1 to F11 and 1 to 10 on the panel. This is available via SW Customize menu with the categorized items.

## **New LCD touchpanel**

The large LCD touchpanel features a new 7-inch WVGA (800x480) panel with improved visibility.

#### **USB** flash drive

The MSU's settings can be saved or loaded via USB flash drive. CAM/CCU/BPU Scene files/Reference files can also be saved, and for the HDRC-4000's HDR Production Converter Unit the All Setting file can be saved.

## **High speed LAN connection**

The MSU-3000 supports connectivity via 1000Base-T Ethernet LAN in addition to a single connection by Sony CCA 8-pin cable.

## Web UI application

Allows convenient remote operation for MSU initial settings from a remote networked PC with intuitive user interface (UI).\*

#### **Status indication**

By the Status key, the connected camera/CCU/BPU's alert status can be indicated on the LCD panel if it occurs. Some of the setting status can be also indicated.
