

SR-256S15

SRMemory Card, 256 GB capacity
and 1.5Gbps guaranteed write
speed

Overview

PRELIMINARY INFORMATION

The SR-256S15 SRMemory Card is an ultra high-speed, high-capacity, and high-reliability flash memory media for SRMASTER series products, ideal for demanding professional applications including 3D production and high-resolution digital cinematography.

The SR-256S15 SRMemory Card has a capacity of 256 GB and guaranteed write speed of 1.5 Gbps. SRMemory is unique with its combination of capacity, sustained data throughput, security and portability. It opens up completely new ways for end-users to work.

This SRMemory Card is specifically designed to be used with the SR-R1 portable memory recorder and can record up to two cameras simultaneously.

Features

PRELIMINARY INFORMATION

This is preliminary information prepared for IBC 2011. All features and specifications are subject to change without notice.

256 GB data capacity

The SR-256S15 SRMemory Card has a capacity of 256 GB, providing extremely high recording times. This provides easy

management of media on-set, even when shooting at high data rates. It is possible to record more than one hour at 1080/25P on to one SR-256S15 256 GB SRMemory Card. This provides easy management of media on-set, even when shooting at high data rates.

Exceptional transfer speeds – up to 1.5 Gbps

The SR-256S15 SRMemory Card offers exceptional transfer speeds – up to 1.5 Gbps write speed for faster transfer of data in post production and for ultra-fast cloning of data on-set or at a live event.

High Data Security and Reliability

The SR-256S15 SRMemory Card features advanced error correction and concealment technologies, providing high reliability and data security for peace-of-mind.

Compact Removable Media

The SR-256S15 SRMemory Cards are compact, highly portable and removable media – 105 x 60 x 9.5 mm, approx. 100 g. They remove the need to transfer files from the server HDD after an event is finished.
