Overview

Taking care of your precious content

This content management software application simplifies the storage, retrieval and management of audio-visual content with Sony's Optical Disc Archive (ODA) system.

A world of solutions

You'll find Optical Disc Archive solutions from Sony at work in a wide range of environments where speedy, reliable access to your precious data is crucial – along with effortless scalability and attractive ownership costs. Optical Disc Archive provides archiving solutions across seven key industries, from digital Media Asset Management to healthcare, banking, education and more.

See our ODA solutions page or contact us now to see how ODA solutions can boost the profitability of everyone's business.

Features

Safeguard your precious content

Archive all your audio-visual materials to shelf-managed Optical Disc Cartridges.

Easy content management

Perform quick, easy browsing, searching and retrieval of archived contents.

Offline cartridge management

Manage a range of offline features, including printing cartridge labels.

Automatic proxy and thumbnail creation

Generates proxy videos and thumbnails for browsing and searching of shelf-managed ODA cartridges.

Advanced search

Perform powerful searches using speech-to-text script and/or face-recognition data.

Checksum Archive

Supports Checksum Archive function.

Direct viewing

Allows direct viewing of audio-visual material on Optical Disc Cartridge (requires installation of Catalyst Browse *1)

*Please update Optical Disc Archive Software to V3.1 or later when using Content Manager V2.3 or later

*1: Please download Catalyst Browse from www.sonycreativesoftware.com/catalystbrowse

Specifications

Specifications

| | |
|-----------|------------------------------|
| Processor | Intel Core i5 3Ghz or higher |
|-----------|------------------------------|

| | |
|--------|--------------|
| Memory | 4 GB or more |
|--------|--------------|

500 MB or more HDD free space is required for installation.

About 300GB of HDD free space is required to archive 1,000 hours of data (the required free space

HDD available capacity

depends on the number and format of files to manage).
When extracting metadata from files on a cartridge, a hard disk drive with free space greater than the total size of the files from which metadata is being extracted is required. Therefore, the maximum free space required is equivalent to the capacity of the cartridge.

OS

Windows
Microsoft Windows 7 Professional or later, 64-bit version
Microsoft Windows 8 Pro or later, 64-bit version
Microsoft Windows 8.1 Pro or later, 64-bit version
