

PCSA-MPE2

16 port expansion software for
PCS-MCS1 Multipoint Control
Unit (MCU) System

Overview

The PCS-MCS1 HD Multipoint Control Unit (MCU) System connects up to four conferencing endpoints as standard.

Offered as an option, this PCSA-MPE2 port expansion software expands the maximum number of supported conferencing endpoints to sixteen.

Please note: Prior to installation of PCSA-MPE2, first requires installation of PCSA-MPE1 4-10 port expansion software (available separately).

Activation key for pre-installed software.
