

VCT-SP2BP

Multi-function Camcorder
Shoulder Support

Overview

A compact and light-weight camcorder shoulder support compatible across DVCAM, HDV & XDCAM EX handheld and semi-shoulder camcorder ranges. The VCT-SP2BP provides excellent, three-point support - at the handle, shoulder, and chest - allowing comfortable 'hand-held' shooting for longer.

The VCT-SP2BP also features a unique collapsible design allowing tripod mounting within seconds. Using the supplied quick release adaptors and a VCT-U14 tripod adaptor the VCT-SP2BP gives you enhanced creative and operational flexibility during your shoot.

The VCT-SP2BP camcorder shoulder support is fully adjustable, allowing you to alter the length of the shoulder and chest braces depending on your body size and/or shooting style. The VCT-SP2BP is also off-set giving you the option of using either the Electronic Viewfinder or LCD Viewfinder depending upon your preference.

Accessories such as the HVR-MRC1K Memory recording unit or the battery adaptor for the HVL-LBPA LED light can be mounted at the rear of the support using a standard tripod screw. The VCT-SP2BP has been designed with the utmost flexibility in mind ensuring that it will suit your operational requirements whilst enhancing your creative options on any shoot.
