

## REA-L0400

Chromakey-less CG Overlay  
License for Edge Analytics  
Appliance

**Edge Analytics Appliance**

Handwriting Extraction  
PTZ Auto Tracking  
Chromakey-less CG Overlay

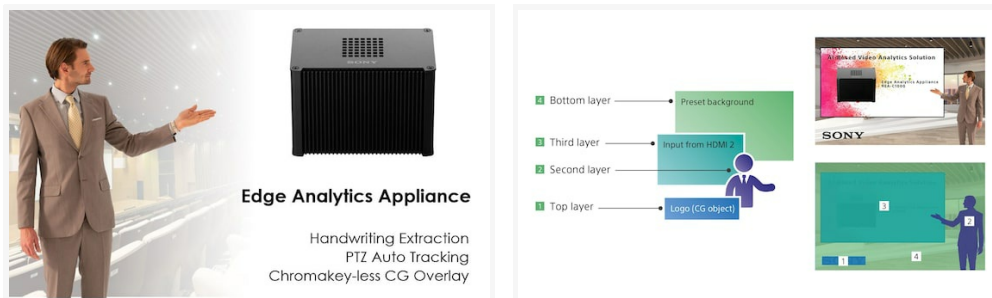

### Overview

The REA-L0400 optional license activates the Chromakey-less CG overlay feature for the REA-C1000 Edge Analytics Appliance.

Using Sony's advanced motion detection technology, the presenter's image is extracted and overlaid onto any background image, animation or video in real time - creating a high-quality backdrop without the need for dedicated studio equipment or a specialist graphics operator.

Note: This is an activation key for pre-installed software

Chroma-key-less CG Overlay

The diagram illustrates the multi-layer architecture of the Edge Analytics Appliance. It consists of four layers:

- 1 Bottom layer: Preset background
- 2 Second layer: Logo (CG object)
- 3 Third layer: Input from HDMI 2
- 4 Top layer: (Implied content from the input)

Two inset images show the appliance in use. The top inset shows a presentation slide with the Sony logo and the text 'Mixed Video Analytics Solution'. The bottom inset shows a person interacting with a large screen displaying a green field with a blue logo, demonstrating the 'Chroma-key-less CG Overlay' feature.
