

HKCU-FP1

Front Control Panel option for
HXCU-100 CCU

Overview

Simple studio system with optional remote control

The optional HKCU-FP1 FrontControl Panel provides remote control capabilities to the HXCU-100 CCU. When the blank front panel of the HXCU-100 is replaced with the HKCU-FP1, the associated camera can be very easily controlled from it. The switches and knobs of the HKCU-FP1 allow access to the most important adjustments of the HXC-100 camera head.

Features

Optional remote control panel to control HXC-100

When the front panel of the HXCU-100 is replaced with the HKCU-FP1, a simple remote control system can be configured. Many functions of the HXC-100 camera can be controlled by the control knobs and switches on the HKCU-FP1.

Cross-compatibility with HSC-300 and HXC-D70 cameras

The HKCU-FP1 attached to the HXCU-100 also provides cross compatibility with HSC-300 and HXC-D70 (when this is working with the CA-TX70 digital triax adapter) cameras.
