

# NXLK-IP40F

SDI-IP converter board with 3G-SDI and SFP+ ports

## Overview

### SDI-IP conversion board

The NXLK-IP40F SDI-IP converter board provides 4x 3G-SDI ports and 2x SFP+ ports for redundancy for network connection. The NXLK-IP40F can convert the signal in a very low latency which enables live production over IP transmission where real-time operation is essential.

## Features

### Support SDI-IP conversion of 4K/HD signals

The NXLK-IP40F supports both 4K and HD video signals. Equipped with 4x 3G-SDI I/O ports, it can convert signals from SDI to IP and from IP to SDI.

### Long distance signal transmission by SFP+ interface

The unit can transmit up to 300m using multi-mode fiber cable with the optional OTM-10GSR1 SFP+ transceivers.

### SNMP capable to reduce equipment downtime

The unit supports Simple Network Management Protocol (SNMP). SNMP is in use worldwide for network and equipment monitoring. Its use allows remote monitoring and effective scheduling of maintenance for minimum disruption to your operations.
