

# PCS-FT1

#### Firewall Traversal Software

#### Overview

This software for Sony PCS-VCS Series videoconferencing servers provides a secure traversal communication pathway through firewalls and routers on IP networks, including multiple network boundary firewalls and NATs.

Traversal paths are easily configurable between client and server.

PCS-FT1 must be purchased together with PCS-FT1SP Support Pack.

#### **Features**

#### Secure traversal pathway

Allow secure traversal communication across firewalls and routers on IP networks.

### **Easy configuration**

Traversal paths are easily configurable between client and server.
