

SBAC-US30

SxS PRO+ and SxS-1 solid state memory USB 3.0 reader/writer

Overview

High speed transfers from SxS PRO+ and SxS-1 cards

The SBAC-US30 SxS PRO+ and SxS-1 memory card reader/writer works on both Windows-based PCs and Macintosh computers via a USB 3.0 interface for high-speed transfer of audio-visual material. The reader is also compatible with a USB 2.0 interface. This compact and portable device is the successor to the SBAC-US20 and comes in handy in many situations on location, for desktop browsing and fully-fledged editing.

Higher speed transfers, approx. 2x faster than predecessor model

Read speeds of approx. 440 MBps from latest SxS Pro+ and SxS-1 cards. Write speeds of approx. 350 MBps to latest SxS Pro+ cards.

Features

Compatible with Windows and Mac operating systems

The SBAC-US30 works on both Windows-based PCs and Macintosh computers.

USB 3.0 and USB 2.0 transfers

The SBAC-US30 provides high speed transfer of audio/visual material from a SxS PRO+ or SxS-1 solid state memory card using an USB 3.0 interface, allowing you to make transfers when your

computer does not have an ExpressCard slot. The device also provides compatibility with USB 2.0.

Bus-powered operation (AC adapter is not necessary)

The SBAC-US30 is compatible with media other than a SxS PRO+ or SxS-1 card when using the following adapters: SD card adapter, Memory Stick adapter, XQD Express card adapter.
