

## WQF-BM1F

Easy to use meeting display software solution for 4K Professional Displays

### Overview

#### **Make every meeting more productive with 4K Professional Displays - free version**

Available to download at no cost, this all-in-one information sharing and display management solution for 4K Professional Displays helps smaller and medium-sized businesses streamline meetings - with no additional investment in hardware or software.

Features include default screen customisation, automatic input switching and a count-down presentation timer.

Also available, the WQ-BM1 Meeting Room Solution (chargeable) adds additional functions, including easy-to-use content sharing tools for meeting room participants plus remote control and monitoring of display from a networked PC.

### Features

#### **Screen customisation**

Give meeting participants a more professional welcome. Display images, corporate logos or web content on your 4K Professional Display, plus the name of the room, date/time and content pulled from other services.

#### **Presentation timer**

An on-screen countdown reminds each presenter how long

they've got left to get their message across to the meeting.

### **Auto input management**

4K Professional Displays automatically switch to the correct input when a new source is connected by HDMI.

### **Auto power off**

Reduces energy bills by switching off the display when not in use.
