

LCN-CC

Color Calibrator License

Overview

The Color Calibrator License* is a paid license that enables the specific features of Color Calibration, allowing for more efficient work.

The specific features are as follows:

- Color calibration
- 3D LUT file generation

*Windows 10 is required.

**To use the plugin, an Internet connection is required when launched for the first time and every 28 days thereafter to access the license server.

***If you would like to complete the whole process of pre-visualization, a Camera and Display Plugin license may also be required.

The Color Calibrator License is available with two different activation periods and easy online activation.

- LCN-CCM1 is a 31-day (monthly) license.
- LCN-CCY1 is a 366-day (yearly) license.

You can purchase your License online (in certain countries) or from your local dealers.

If you already have a purchase code, please obtain the installation key from the “License Management” tab above.

Please note that the license purchased online from Creator's Cloud and the one purchased from dealers are not compatible. It is not possible to extend the license on different platforms.
