

PVMK-PX18

Protection panel for PVM-X1800

Overview

Protection panel for PVM-X1800 18-inch 4K TRIMASTER high-grade picture monitor

The PVMK-PX18 accessory is a protection panel for the PVM-X1800 portable 18-inch monitor—safeguarding the premium LCD screen from scratches and impacts during transportation and preparation.* The PVMK-PX18 is easy and quick to attach and detach, without the need for any tools.

Where a PVMK-PX18 is attached, panel damage is reduced and there is a far lower incidence of panel replacement and downtime—of particular significance during rental cycles, for example.

The PVMK-PX18 optional protection panel can also be mounted together with the rack-mount bracket PVMK-RX18.**

*The optional protection panel cannot be used in operation for avoiding any thermal problems with the monitor.

**Clearance space at the top of the monitor is required to enable attachment and detachment.

Features

Protection panel

The PVMK-PX18 protection panel is designed to fit precisely on the PVM-X1800 monitor's front surface. The premium LCD screen of the PVM-X1800 is protected from inadvertent scratches and

shocks during transportation and preparation.

Simple attachment/detachment mechanism

The protection panel grips the monitor from the upper side and holds it using spring stoppers on the lower side of the screen bezel. No tools are required—the spring stoppers of the protection panel are released to attach and detach.

Use with rack-mounted monitor

The PVMK-PX18 optional protection panel can be mounted together with the rack-mount bracket PVMK-RX18.*

*Clearance space at the top of the monitor is required to enable attachment and detachment.
