

## WQF-IPR1

IP remote control solution for 4K Professional Displays

### Overview

#### **Control functions of Professional Displays with iOS/Android portable devices.**

Remotely control the functions of BRAVIA 4K Professional Displays using your tablet or smartphone (iOS/Android) by downloading from the Apple App Store or Google Play.

This easy-to-use app lets you switch the display's power on or off, select an input source and launch other applications.

Several different 4K Professional Displays can be controlled independently using just one portable device.

### Features

#### **Control your 4K Professional Display remotely**

Use your tablet or smartphone (iOS/Android) to control functions of your 4K Professional Display remotely.

#### **Control mutiple displays**

Several Professional Displays can be registered to a single portable device and controlled independently.

#### **Switch power and input source**

Use your device to switch display power on or off, and select an input source.

## **Launch HTML5 applications**

Use the remote app to launch HTML5 applications.
